

# Dominick Jay

hi@dominickjay.com

I'm a front-of-the-front-end developer with 10+ years of experience, with a strong focus on semantic HTML, modern CSS, and vanilla JavaScript. I'm drawn to open-source culture - building transparently, in collaboration with a community, and with a real sense of purpose behind the work.

## Recent Full Time Experience

### Front End Developer - Series Eight

April 2022 - Present

At Series Eight, I've worked with multiple CMS's - Shopify, CraftCMS and Webflow - providing award winning websites and user experiences using TailwindCSS and AlpineJS. Most recently, I've been part of a specialised team to handle retained and ongoing clients - allowing for improved client relationships and improved processes.

### Software Engineer - Rowe IT

November 2019 - April 2022

At Rowe IT, I was part of multiple teams, conducting work using AWS Lambdas as well as conducting accessibility testing and improvements against the Met Office systems.

### Creative Developer - GOSS Interactive

April 2017 - November 2019

At GOSS Interactive, I worked on customising off-the-shelf themes for councils across the country, conducting client training via in-person, audio and video meetings. Also supported clients with more bespoke solutions as part of a developer support team.

### Junior Web Developer - n9Design

June 2016 - March 2017

At n9Design, I was responsible for building marketing email templates, alongside ongoing maintenance of existing client websites and creation of bespoke sites with an in-house CMS. I also introduced Gulp to the team for asset compilation.

### Junior Web Developer - Logo Design

August 2015 - May 2016

At Logo Design, I helped with maintenance of existing sites using an array of different CMS platforms and undertook company-wide server consolidation.

## Relevant Experience

### HTML, CSS & Javascript

10+ years writing semantic, accessible HTML across CMS-driven and headless projects.

Strong CSS work including custom properties, animation, and utility-first approaches across a range of client builds.

Day-to-day usage of AlpineJS for functionality and progressive enhancements.

Contributed to and extended design systems, with experience spotting consistency opportunities across tools.

### Soft skills

10+ years writing semantic, accessible HTML across CMS-driven and headless projects.

Strong communicator - excellent at transferring technical knowledge into clear recommendations for clients and PMs.

Detail-oriented by habit and keen to ensure both the UX and any client facing editors work as seamless as possible.

Comfortable in agile, cross-functional teams working alongside designers, PMs, and other engineers.

### DevOps & tooling

Headless CMS fluency across CraftCMS and Sanity, including content modelling and editor experience considerations.

Netlify and Servd hosting experience - environment config, redirects, and build pipeline debugging.

Shopify platform depth - CLI, theme architecture, metafields, Checkout Blocks, and third-party app integration.

Previous experience with AWS, Lambda and CI pipelines such as Jenkins.
